Portfolio: <https://portfolio-cweiner.vercel.app/>

Experienced Full Stack Developer with a solid professional background in e-commerce, recognized for leadership in commercial teams at prominent companies such as Rappi, Kavak, and in the tourism sector. Proficient in agile methodologies, GIT, data structures, algorithms, and CSS Tailwind frameworks. Skilled in Front End and Back End development using JavaScript, Node.js, React, Redux, among others. Hold a Bachelor's degree in Tourism and Hospitality, backed by a Master's in Business Administration. Developed leadership, problem-solving, and teamwork skills in previous roles, ready to contribute to future projects. Advanced proficiency in English.

Tech Projects

FullStackDeveloper - Weather app

January 2024

Explore real-time global weather information with this React and Material UI-powered application.

Link: <https://weather-app-one-steel-40.vercel.app/>

FullStackDeveloper - Videos App

December 2023 - January 2024

This small video app was a personal project using MERN technologies. The application allows you to upload videos with YouTube links, edit the posts, and delete them.

FullStackDeveloper - Connect Ink Academic Experience: Henry Bootcamp

November 2023 - December 2023

ConnectInk provides a unique platform to connect tattoo artists and clients. The application allows tattoo artists to showcase their art, availability, and services, while clients can explore profiles, appreciate artwork, and easily and securely book appointments. We implemented a payment system through MercadoPago, enabling clients to conveniently pay deposits.

Back End: Node.js y Express || Front End: React Redux Toolkit || Framework: Next.js. || Database: PostgreSQL, Sequelize.

Link: <https://connectink.vercel.app/>

Full Stack Web Developer - Pokemon App Academic experience - Henry Bootcamp

October 2022 - November 2023

Developed an application utilizing the PokeAPI (<https://pokeapi.co>) to provide updated information about Pokémon. The platform stands out for its visually appealing rendering, advanced filters by features, and the unique ability to allow users to create their custom Pokémon, providing an interactive and immersive Pokémon world experience..

Front End: Node.js y Express || Back End: React-Redux || Database: PostgreSQL y Sequelize.
